

APEX CLIMATE SERVICES · HEAT-WAVE OPERATING REVIEW**Synthetic demo data**

First Heat Wave: Parts, Not People

Apex Climate Services operating review: isolate the branch-level parts constraint behind callbacks, SLA misses, overtime, and margin leakage before adding headcount.

SOURCE Verified assertion · sha256:e886a65c...

Real/client mode disabled — demo remains on the governed synthetic snapshot until approved metadata or exports exist.

SCENARIO PACKAGE

First Heat Wave: Parts, Not People

SCENARIO

UPSTREAM ARTIFACT

sha256:e886a65cea294553d38c0c42c7f2625e7f504b01fe5dd7bad809bb852fc727ab

A verified synthetic-data work package is consumed as a read-only snapshot through the shared DashboardSpec and DataAdapter path.

[Open Builder](#)**DATA READINESS**

Controlled synthetic-data quality

Synthetic demo data

All datasets in this work package are deterministic synthetic demo data; they are not observations from a live Snowflake account.

0 requested · 0 injected · 0 independently detected · 0 unexpected

Verified upstream artifact

sha256:e886a65cea294553d38c0c42c7f2625e7f504b01fe5dd7bad809bb852fc727ab

- The approved curated pack and scenario remain the clean semantic baseline.
- Controlled faults are bounded to the approved fault plan and output limits.
- The SQLite artifact and derived snapshot contain synthetic demo data only.

NARRATIVE ARC

Walkthrough spine for the command-view conversation

HOOK

Demand grew. Capacity got trapped in repeat visits.

SOURCE Verified assertion · sha256:e886a65c...

CONTEXT

First-time fix is the capacity multiplier.

SOURCE Verified assertion · sha256:e886a65c...

TENSION

Two branches create most of the drag.

SOURCE Verified assertion · sha256:e886a65c...

RESOLUTION

Move parts before adding people.

SOURCE Dataset evidence · parts_constraints · sha256:e886a65c...

CALL TO ACTION

Make three reversible decisions this week.

SOURCE Verified assertion · sha256:e886a65c...
